SUMMARY

Developer with experience in Python, web development, data analytics, and database management through academic projects and industry job simulations. Worked on projects like a face detection system using basic AI/ML concepts. Currently learning AI/ML and Data analytics interested in building intelligent and data-driven applications.

SKILLS

Databases

- MySQL
- MongoDB

Frontend

- HTML
- CSS
- JavaScript

Data Analytics

- Python & SQL
- Data Cleaning
- Data Visualization

Development Tools

- Git & GitHub
- Tableau

INTERNSHIP

Deloitte Australia Data Analytics Job Simulation

2026

- Completed a job simulation involving data analysis and forensic technology for Deloitte Australia.
- Built an interactive data dashboard in Tableau to visualize business insights and support decision-making.
- Analyzed and classified datasets using Excel to identify patterns and derive actionable business conclusions.

JPMorgan Chase & Co. Quantitative Research Job Simulation

2026

- Completed a job simulation focused on quantitative research and credit risk analysis.
- Analyzed a portfolio of loan data to estimate customer probability of default (PD) using Python.
- Applied dynamic programming to transform FICO scores into categorical risk groups for predictive default modeling.

PROJECTS

Face detection system (Python, OpenCV)-Mumbai University

2026

- Developed a real-time face detection and recognition system using Python, OpenCV, and CNN-based facial encoding techniques, achieving ~80% recognition accuracy.
- Designed a simple web dashboard for attendance monitoring, report generation, and student record management.

Tourist Website (HTML5, CSS3, JavaScript, MySQL)-Mumbai University

2025

- Built dynamic user modules using PHP and MySQL for destination management, booking inquiries, and user authentication
- Designed a user-friendly interface with HTML5, CSS3, and JavaScript to enhance navigation and overall user experience.

CERTIFICATES

- [Foundations: Data, Data, Everywhere | Google Data Analytics](#)
- [JPMorgan Chase & Co. Quantitative Research Virtual Experience Program on Forage](#)
- [Deloitte Australia Data Analytics Job Simulation on Forage](#)
- [Tata - GenAI Powered Data Analytics Job Simulation](#)
